Samuel Turner

Morning Review (α&β Strategy)

Good morning, community members!

I'm Samuel Turner, and today I want to share an observation I've made throughout my journey in entrepreneurship and investing. When faced with challenges, many people are quick to give up. Even when opportunities are abundant, some take bold action, while others, despite making a decision, abandon their goals midway due to a lack of resolve. This is the real reason many fail.

Investing and entrepreneurship are like marathons testing your willpower and determination. Only those who persist to the end can stand on the winner's podium. I've seen too many people surrender to market fluctuations or short-term setbacks, abandoning their initial dreams and goals. They could have

secured a place in the game, but their lack of perseverance led them to miss out on success. This isn't an exception but a common phenomenon.

Every fluctuation and challenge is an opportunity for growth. There's no smooth road to success. The great entrepreneurs and investors we admire today all faced numerous failures and difficulties but chose to keep going, ultimately achieving their own brilliance.

Friends, remember that success is never achieved overnight. Every market rise and fall, every storm, is a test of our resolve. If you give up in the face of market fluctuations, you lose not only immediate gains but also the unlimited returns of the future. Every surrender is a bow to failure, and every step forward is a march toward success.

On the path of investing and entrepreneurship, what matters most isn't technical expertise or resources but the resilience of your will and the strength of your spirit. Members of IAT community, once you've made a choice, stay the course. Don't let temporary difficulties or setbacks shake your belief. Only those who stride confidently through the storm are the true winners.

Let's stand together, hold fast to our beliefs, embrace challenges, and create a brilliant future with our wisdom and persistence. Success is not out of reach, it's right in front of you, waiting for you to seize it!

In the earlier sessions, our helmsman delved deeply into the importance of compounding, a remarkable force that allows capital to grow like a snowball rolling downhill, becoming larger and larger. Over the past 30 trades, we've achieved victory every single time, undoubtedly proving the exceptional performance of AlphaStream 5.0 as a stable and highly efficient profit-generating system. By accumulating small gains, we are steadily moving closer to achieving the Crypto Grammy (200-600%) Profit Challenge goals. Trust me, friends, it's only a matter of time.

During the Christmas holiday, while the U.S. stock market was closed, crypto market remained active. This is one of the unique charms of the crypto market, it never shuts down, always offering opportunities, with money never sleeping! It allows us to maximize the use of time and capital costs, achieving more efficient profitability.

From the moment this trading boot camp began, I made a promise to myself: I will give it my all, achieve a qualitative leap during this training, and step into the billion-dollar club. This is not just a goal but a personal challenge. I've devoted 100% of my effort, breaking through in strategy, mindset, and execution. This is not merely a boot camp, it's a journey to change one's destiny.

Friends, this journey is not easy, but every ounce of effort is worth it. Only when we give our all do opportunities truly present themselves. In the investment market, listening to others is never enough, the real key lies in action. Many people talk about plans and goals, but only a few take that decisive step. Those who dare to act often reap returns far beyond their expectations.

I've ingrained helmsman's strategies and guidance into my mind and have executed them rigorously in every trade. There are no shortcuts to success, it stems from unwavering belief and consistent effort. And you? Are you proving your determination with real actions? Have you truly given your all to achieve your goals?

If the answer is “not yet,” now is the best time. The opportunities in the crypto market are right in front of you, and AlphaStream 5.0 is the best tool to lead us to a glorious future. Seize it, go all out, and let your actions be worthy of your dreams!

Important Note: AlphaStream 5.0 has detected the latest short-term trading signal. This is a short-term trade accessible to all VIP groups. Please, all VIP members, get ready to execute.

Friends, through AlphaStream 5.0’s trading signal, we just captured nearly 60% profit from the CBF/USDC crypto index in less than 25 minutes! Victory after victory like this demonstrates the boundless possibilities of crypto market and adds another glorious highlight to our undefeated record.

Congratulations to everyone who participated in this trade! Your exceptional execution, with each decisive move, continues to create miracles. This is the power of AlphaStream 5.0, precise trading signals delivering substantial returns in a short time. Remember, behind every success lies meticulous strategy and disciplined execution. Each successful trade is a crucial step toward achieving greater goals.

Folks, get ready for an adrenaline rush! During calm periods in the market, we may take a brief pause, but when a powerful trend sweeps in like a tsunami, that's our moment to go all out and showcase the true power of contract surfing! And during slow market movements, like sharks lurking in the deep sea, we can still strike with precision using our carefully crafted crypto index strategies and reap abundant rewards.

Right now, I can feel the brewing wave of heat, the Non-Farm Payroll data at the beginning of next month will bring a spectacular 600% profit opportunity! This opportunity is as grand as a volcanic eruption, it cannot be missed! Imagine capturing such a chance, it's like successfully catching the rarest giant shark in the vast ocean. One success could outweigh dozens of regular trades. If we can capture such opportunities weekly, the rest of the time can be spent enjoying the peace of fishing, letting our minds relax.

So, the question is: Will you chase this 600% massive profit opportunity, join our Wealth Matrix Strategy to pursue the giant shark, or both?

Friends, this is the perfect time for dreams and actions to align, for wealth and wisdom to shine together! Every day ahead is full of infinite possibilities, and all we need to do is stay ready and face every challenge with all our might.

Next week, a new journey is about to begin, another excellent opportunity to write your investment legend! Embrace every moment, ensuring each trade becomes a cornerstone of your success.

Wishing everyone a wonderful weekend, recharge, refocus, and get ready to continue crafting our great chapter next week. Let's move forward at full speed and create even more brilliance together!

Professor Theron Vale (Helmsman)

Closing Commentary

Good afternoon, my friends!

I am Theron Vale, your old friend. Thank you to Samuel Turner for the wonderful sharing this morning. Through his personal experience, he demonstrated an unchanging truth: only by giving your all can you achieve victory in entrepreneurship and investment. This is not only Samuel Turner's secret to success, but also a trait shared by every strong individual who stands out in this fiercely competitive global market. We all know that the market is full of change and uncertainty, and those who achieve great accomplishments are always the ones who focus on the most certain opportunities in the present.

Samuel Turner's story is not just his personal journey of struggle, but also an inspiration to each one of us. On this challenging journey, we will all face setbacks and difficulties, but the key to success lies in whether we can maintain our faith, focus on the most promising opportunities, and take action without reservation.

Dear friends, in this ever-changing market, we all have opportunities, but not everyone can seize them. Why? Because most people are always hesitating, waiting, while those who act with full commitment have already taken steps and seized their future. Success is never accidental, it requires us to build upon focus and effort, and to chase our dreams with persistent passion.

In investing, fully committing to the most certain opportunities means letting go of those unclear options, abandoning distractions that may divert our attention, and dedicating our time, resources, and wisdom entirely to the most valuable goals. This is the strategic thinking that mature investors must possess.

So, friends, whether facing market fluctuations or other challenges in life, remember that Samuel Turner's story is a success example that each of us can replicate.

Focus, determination, and action are the essential paths to success. As long as we maintain this belief, the market will surely reward us with rich returns.

Recently, through a large number of institutional reports, we can clearly see an interesting phenomenon: the current high-level buying in the market mainly comes from retail investor funds, while a significant amount of institutional funds has chosen to lock in profits at high levels and shift to holding cash. Although the three major indices continue to run at high levels, they are still in a consolidation and correction phase. If the high-level sideways movement lasts too long, it is possible that a monthly-level correction may be triggered.

As shown in the chart above, Chart 1 displays the daily candlestick chart of the S&P 500. The downward pressure of the trend has already formed, and the gap below has not yet been filled. Based on historical trends, the likelihood of the gap being filled is very high. Chart 2 shows the monthly candlestick chart of the S&P 500, which has reached a critical point for adjustment. The possibility of a pullback to the middle band of the BBands is increasing, and the support level of this monthly uptrend line is around 4850 points. Over time, the lower band of the monthly BBands will further approach this level.

As mature investors, we must be prepared for the upcoming monthly-level adjustment. If you are still planning to buy stocks at high levels, it might be a good idea to calm down and think: Why do investment giants like Warren Buffett significantly reduce their stock holdings at high levels and hold over \$300 billion in cash? Why do many institutions choose to lock in profits and decisively sell at high levels? This is the best embodiment of the so-called "institutional thinking" in the current market environment.

The significant buying opportunity at the beginning of January 2024 has passed, so where are the opportunities for 2025? The answer is simple: we need to patiently wait for the market to complete its adjustment and prepare for the next cycle. As stated in the Bible, "To everything there is a season, and a time for every matter under heaven." The market is no different. No matter how the market changes, finding the right timing is the key to our success.

Friends, let us greet future opportunities with calm eyes and patient waiting. Remember, the core of investing is not just in taking action, but in making the right choices at the right time. By viewing the market through institutional thinking, you will find everything becomes much clearer.

Last week, based on your feedback and the comprehensive market trends, we officially launched the AlphaStream 5.0 Crypto Grammy (200-600%) Profit Challenge, setting clear profit targets for three consecutive weeks. This is not only an important battle for achieving excess returns, but also a journey where we will write a glorious chapter together. It is an immense honor and pride for me to fight alongside all of you.

Many friends are already prepared, and I am fully equipped to join you in the battle for next month's non-farm payroll 600% profit opportunity. Starting today, this will become one of our most important tasks. On Monday, the countdown for the non-farm payroll 600% profit opportunity officially begins. To ensure everything goes smoothly, I strongly recommend adjusting your capital allocation: keep 10% of your position in the stock market, and move 90% of your funds to the crypto market to fully prepare for the non-farm payroll. This is based on a comprehensive judgment of the current high-level fluctuations in the stock market and the greater certainty of opportunities in the crypto market.

At the same time, we need to manage our profits more wisely, by continuously building a wealth matrix, investing half of each profit into 30-day financial products. This strategy will gradually accumulate funds in the financial products, ultimately allowing it to far exceed your initial capital. As the returns from these financial products multiply, we can boldly increase our positions and achieve unimaginable profits in crypto contract surfing. Are you excited about this strategy?

Friends, I know many of you are already taking action. Let's move forward together, using these profound insights and precise strategies to pave a solid path toward our dreams and financial goals. Believe in yourself, and also believe in the power of our collective efforts. At the beginning of next month, we'll meet at the peak of the non-farm payroll opportunity!

THE MOST MOTIVATIONAL POSTER EVER

$$1.01^{365} = 37.8$$

$$0.99^{365} = 0.03$$

In the journey toward wealth enlightenment, we must deeply understand the transformative power of compound interest, this is the core principle of wealth creation and the key to making dreams within reach.

Recently, during discussions with some friends, I noticed that everyone has different views on the total asset return of the 'AlphaStream 5.0 Crypto Grammy (200-600%) Profit Challenge' plan. Some friends were surprised when they saw our profit targets because they had been too busy to keep up with group information, while others, due to being overly adventurous, lost control over risks and thus fell behind in terms of returns.

The beauty of compound interest lies in its simplicity and power: from 1 to 2, then 4, 8, 16, 32... each step is an exponential growth accumulation. Through the power of time and persistent execution, moderate returns will eventually transform into immense wealth. Let's understand this with a simple assumption: suppose we earn a 60% return on a 10% portfolio. This might seem to only bring a 6% increase in assets, but when compound interest takes effect, the impact becomes extraordinary. If we repeat this process 10 times, the assets will grow by 79%; repeat it 20 times, and they will grow by 220%. This means that an initial investment of \$100,000 can gradually turn into \$179,000, or even \$320,000!

But what if your initial capital is \$500,000, \$1 million, or even more? Would you still feel that achieving a million-dollar profit is an unattainable dream? The AlphaStream 5.0 Millionaire Club has already provided us with a clear and efficient path. Through the compound interest strategy, each step lays the foundation for your wealth growth, helping you move forward steadily.

Although our journey is filled with a brilliant record of victories, please don't forget that every victory has been hard-earned. They are the result of patience, strategy, and an unwavering pursuit of excellence. It is these victories, big and small, that, over time, have helped us pave the way to great achievements.

For those who may encounter setbacks at certain stages, please don't be discouraged. Our community is here to support you, encourage you, and provide you with comprehensive guidance. No matter what your current situation is, as long as you are determined to change, the door to success is open for you. If you need more targeted, personalized strategies to help you catch up faster, feel free to DM me. I will do my best to help you find the solution that works for you.

Dear friends, this is our shared journey, and every step forward relies on the power of compound interest. As long as we maintain steady growth, follow each trading signal, and stick to our profit targets, achieving this profit goal is not only possible but an inevitable victory. This path requires us to move forward with an optimistic attitude, patient waiting, and unwavering belief in our shared vision.

In this process, we will face challenges and reap abundant rewards. Every market fluctuation is an opportunity to improve ourselves and sharpen our skills. Let us embrace each challenge with unwavering belief and relentless effort, seizing every opportunity. The power of compound interest lies in the accumulation over time; even small steps forward will eventually bring about great change. Believe that steady growth will not only help us achieve our goals but will also bring results far beyond our expectations.

This is not just the wisdom of investing, but the philosophy of life. Let us greet each trading day ahead with a positive attitude and firm steps. Believe in yourself, believe in the team, and victory belongs to those who persevere and march forward. As long as we stand together, the goal is ahead, and success will be ours!

Special Reminder:

The non-farm payroll data at the beginning of next month is expected to bring a profit opportunity with around 600% potential returns. This is an opportunity you don't want to miss! To help everyone better capture profits and manage risks, all trading signals will be exclusively released in the VIP Partner group. My main focus will also be on the VIP group, providing more precise guidance and support.

If, for any reason, you haven't yet joined the VIP Partner Group, please direct message my assistant immediately to request assistance. The market volatility surrounding Non-Farm Payroll (NFP) data doesn't just occur on the day of the release, the entire week will be accompanied by significant data-driven market movements. This is a sustained opportunity and absolutely worth your full effort!

Remember, the size of your investment capital determines the magnitude of your returns. If you're ready to seize this extraordinary opportunity, be sure to gather sufficient funds by January 8. Facing such a historic opportunity, what we need is decisiveness and action. Only with thorough preparation can you stand out in the market and claim the wealth that's yours.

The market never waits for those who hesitate. Every moment of preparation determines your success or failure. Now is the time to act! If you have any questions or need further assistance, please contact my assistant immediately. We will provide you with timely and precise support in the VIP Partner Group, helping you make the best decisions at critical moments.

It's the weekend again, wishing everyone a pleasant weekend. See you next week as we look forward to an even brighter future together!
