To every partner in the IAT community. From 1000% to the next frontier of wealth, embracing the golden era of the 2025 crypto market!

Dear IAT Family Members,

I'm Theron Vale, your longtime friend and the founder of the IAT community. At this moment, I write this letter with immense excitement because we are standing at a historic turning point.

Looking back over the past few months, we have created an extraordinary legacy together! From two rounds of testing with AlphaStream 5.0 to the successful conclusion of the Battle of King 1000% Profit Challenge, we have not only witnessed the precise execution of trading strategies but also the tremendous rewards that trust and discipline bring! This was more than just a trading simulation, it was a test of resilience, a triumph of conviction, decision-

making, and action! We didn't just generate remarkable profits, we demonstrated to the market the strength and commitment of our team!

From the very beginning, we made a promise to turn conviction into profit, to make trading a tool for financial freedom! Today, we have not only fulfilled that promise but have also built a truly powerful community, where every participant has reaped their own victory! This was more than just a trading boot camp, it was a test of resilience, a commitment to the future, and a realization of each community member's dreams! Now, we stand at a new starting point, ready to embrace an even greater challenge. 2025, the inaugural year of crypto's next era, where a trillion-dollar ICO market is opening its doors to us!

The Next Battlefield, The Golden Era of IEOs!

True investors never settle for past glory. Markets evolve, and so must our strategies! 2025 has been hailed as the "Inaugural Year of Crypto," with a trillion-dollar ICO market on the verge of explosion. Yet, the IEO (Initial Exchange Offering) market will be the key to our next leap in wealth! With AlphaStream 5.0's big data analytics and subscription numbers reaching pre-launch expectations, we are fully prepared to step onto an even greater stage! But true investment masters never dwell on past success, they keep moving forward,

constantly seeking higher-probability opportunities. Starting next week, we will shift our focus to the IEO market, guiding you in locking in high-growth potential projects poised for exponential gains!

Why Are We Choosing IEO?

- ✓ Higher Certainty, Lower Risk**

IEOs are directly vetted by exchanges, avoiding the chaos of ICOs and offering significantly higher security than typical projects.

- ✓ Greater Transparency in Capital Flow** High-quality IEO projects provide clear subscription data, allowing us to accurately gauge market demand through progress tracking.

- ✓ Extremely Short Opportunity Window**

In capital markets, primary market investors are often the biggest winners. IEOs provide a rare gateway for regular investors to access the primary market!

We've already seen the crypto market heating up, and IEOs are the most certain and secure investment opportunity right now! This means you no longer have to endure the extreme volatility of contract markets, instead, you can

strategically position yourself in the primary market and experience a true leap in wealth!

Starting next week, we will reduce high-frequency contract trading and shift our focus to the more certain and higher-yielding IEO market! We will handpick projects with disruptive potential, strong institutional backing, and real-world applications, leading the way in early positioning to seize the next major market opportunity!

Of course, short-term market fluctuations will still present contract trading opportunities. If a high-probability contract setup emerges, we will immediately notify everyone, ensuring that no potential profit opportunity is missed! For those eager to delve deeper into contract trading, we will also provide exclusive, customized strategies for AlphaStream 5.0 presale subscribers, helping you take your contract trading to the next level! This is not just a trading tool, it is a key to unlocking the doors of future wealth!

This is an invitation to lead, not follow!

The market always rewards those who dare to act early, while hesitation and waiting have never created wealth! 1000% was merely a milestone, not the finish line, our goal is to seize true control of the market and capture the first-mover advantage in the 2025 crypto landscape!

Opportunities don't wait, markets always belong to those who position early and take bold action! If you've already achieved initial success in this market, now is the time to elevate your investment mindset to a higher level. If you missed the profit opportunities in contract trading, the upcoming IEO market will be your best chance for a breakthrough. We must shift our perspective, approaching the IEO market with the mindset of a true investor. This market presents exceptional opportunities, aligning perfectly with the future strategy of America's crypto capital. A trillion-dollar ICO market is emerging, poised to create historic wealth opportunities and financial freedom for those who act decisively. If you're still on the sidelines, now is the time to take control of your future!

Now, I invite you to stand with me at the forefront of this financial revolution, not just as a market participant, but as a market leader! The IEO gold rush has begun, and we will not be left behind!
