Professor Theron Vale (Helmsman)

Morning Review

Good morning, team!

I am Theron Vale, your old friend. In the world of investment, the secret to success is never waiting, but action. Great entrepreneurs, investors and innovators are those who act decisively after seeing the opportunity, rather than those who hesitate and wait for the "perfect time". Warren Buffett once said: "When the opportunity comes, you must go all out, because it will not wait for you." Bill Gates also said frankly: "Seizing the trend is more important than hard work."

So what are we facing now? This is a zero-risk, high-certainty opportunity, MDHT's IEO. The progress bar has exceeded 3000%, and everything in front of

us clearly tells us that this is an opportunity that must be ALL IN, rather than a time to wait and see.

Let's look at classic cases:

- **When Apple started, investors only needed \$1,000, which has now become millions of dollars. Many people did not believe in Jobs' vision at the time, but those who acted decisively are now at the pinnacle of wealth.**
- **The price of Bitcoin was less than \$1 in 2010, and today it has exceeded \$100,000. Those who "ALL IN" at the time have already achieved financial freedom, while those who hesitated can only regret it now.**

Those who take action, not those who hesitate! Dear friends, I want to emphasize that the market will not wait for you. The real winners are those who act without hesitation when the opportunity comes. If you want to get different results, you can't always use the same method. Jobs once said: "You can't let other people's opinions influence your own heart. If you want to achieve greatness, you must be brave enough to make your own decisions."

So, how should you choose now? MDHT's IEO is a definite opportunity, and we must be decisive ALL IN! The opportunity is already in front of us, will you choose to be the one who regrets missing the opportunity, or the one who wins wealth freedom with firm actions?

You know, I always say that "the real winners in the capital market are never those who wait, but those who dare to act without hesitation in the face of certain opportunities." Opportunities are fleeting, and success always belongs to those who dare to make decisive decisions. Are you still hesitating? This is not a matter of choice, but a moment of wealth leap that must be seized!

If you don't want to regret it later, if you really want to change your future, now is the time to take action! Lock on MDHT, ALL IN Green Special Channel!

This is not just an investment, it is an opportunity to take yourself to a higher level, it is a choice that can change your destiny. I hope that each of us can take this historic opportunity and make a brave move to create our own glory!

Friends, let's go back to the market and take a closer look at the current risk signals. The Dow is still fluctuating and consolidating in the box. The longer it goes sideways, the greater the risk of a correction. At the same time, the VIX panic index is still hovering around 16. On the surface, market sentiment is stable, but this is actually very unfavorable to bulls. Once the VIX panic index soars sharply, market adjustments will be inevitable. At that time, the decline of the three major indexes may become the main theme of the market. The

"Magnificent Seven" stocks are releasing major risk signals, and investors are advised to take decisive action!

📉 Signal 1: The Magnificent Seven accounts for too high a proportion of the S&P 500 index, and the market concentration has reached a dangerous range. The share prices of the Magnificent Seven have soared in recent years, and now account for 31% of the total market value of the S&P 500 index (as of the end of January), which is close to the historical extreme level. If we adjust the beta coefficient calculation, their exposure to the market is as high as 45%. In other words, if a fund manager allocates the "Magnificent Seven" according to market weights, then almost half of the market risk exposure in his/her portfolio is concentrated on these seven stocks! This is a rare extreme phenomenon in the past 25 years. Once the market sells off, the entire market will face violent fluctuations.

📉 Signal 2: Capital expenditure growth is too fast, and the quality of earnings is questionable

In the past year, the "Magnificent Seven" have increased capital expenditures. By the end of 2025, their capital expenditures are expected to account for 14.5% of sales, a record high. But the question is, can revenue growth keep up with

such spending speed? The market has begun to question the return on these huge investments. If the financial reports in the next few quarters cannot prove that these investments can bring substantial benefits, the patience of the capital market will be exhausted, and stock price adjustments may occur at any time.

 **Signal 3: Valuations are close to historical highs, and the risk-return ratio has deteriorated significantly**

The valuations of the Magnificent Seven have reached unprecedented highs, and the current "future P/E ratio" is 42% higher than the top eight stocks in the S&P 500, which is also close to the highest level in the past 25 years. We know that the high valuation of the market itself will not cause a crash, but when market sentiment changes, liquidity tightens or policy uncertainty occurs, highly valued stocks are often the first to be sold.

 **How long can the market's capital support last?**

Some of the "Magnificent Seven" stocks have begun to adjust this year. Affected by policy uncertainty, the rise of China's AI startup DeepSeek, and the global sell-off of technology stocks, funds are looking for a more certain safe haven. If the market's capital support withdraws, the adjustment of the high valuations of

the Magnificent Seven will be inevitable, and investors who are still deeply involved in it will face huge risks.

As I analyzed before, the uncertainty in the current market is increasing, and the deterministic investment opportunities in the crypto market are exploding! When the stock market is full of uncertainty and the valuation bubble of the Magnificent Seven is getting bigger and bigger, smart investors should choose a risk-averse strategy and move funds to a more certain market, high-quality IEOs in the crypto market are the best choice at present.

MDHT's current subscription progress bar has exceeded 3000%, which fully demonstrates the market's recognition of this project. Unlike the uncertainty faced by the Magnificent Seven stocks, the profit model of MDHT IEO is based on the market supply and demand relationship, and does not need to bear the valuation risk of the secondary market. This is one of the most robust strategies in the current market environment.

Friends, now is the time to adjust your investment portfolio. Don't let the high-volatility stock market consume your funds and opportunity costs. Smart investors always flow funds to the track with high winning rate! Act decisively,

seize the most certain investment opportunities at present, deploy MDHT IEO, and stay away from the upcoming storm of the stock market!

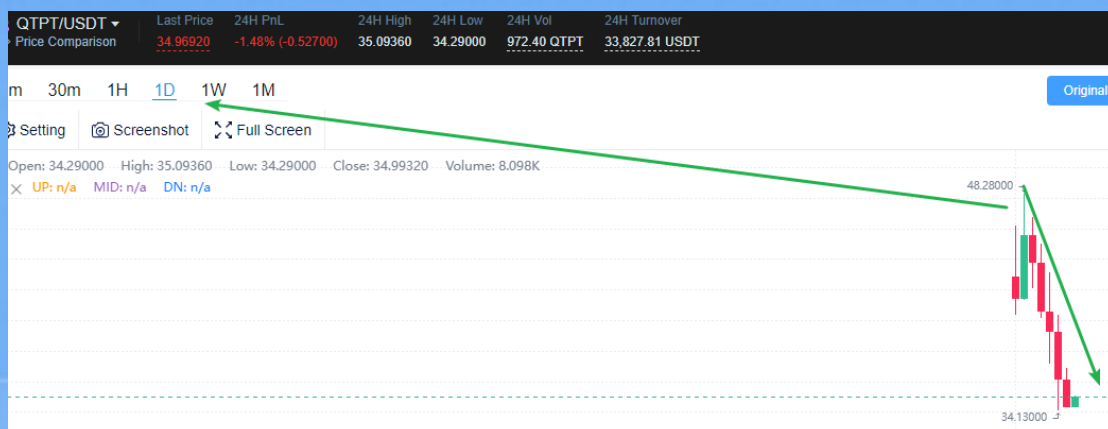

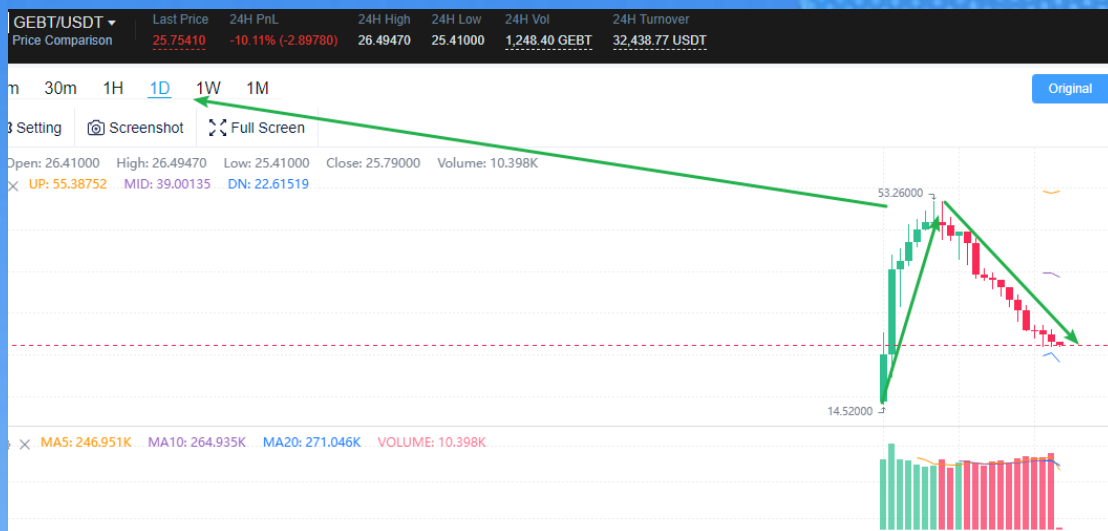

The flow of funds reveals the truth of the market, the choice of institutional funds is the most profitable direction! It is undeniable that no matter which investment market, institutional funds are always the trend leaders. They have more acute market insight, larger funds, and more mature risk control systems. Looking back at the current US stock market, we will find an obvious phenomenon: after the previous hedge funds sold off sharply, institutional funds did not rush to return to the stock market, but chose another more certain path, the crypto market.

What does this show? It's simple, hot money always flows to the most profitable market! The flow of institutional funds is not random, but a layout after precise calculation. When the crypto market becomes the focus of capital chasing, it means that this market has entered a high-profit cycle. This is not only a change in market trends, but also a vote of institutional funds on future growth potential.

More importantly, the higher the proportion of institutional funds in the market, the stronger its stability and sustainable profitability. This is why GEBT rose for

7 consecutive days after listing, because it was supported by a large amount of institutional funds, while QTPT quickly pulled back after listing due to the high proportion of retail funds. The market does not fluctuate randomly, but reflects the will of capital. Smart money will always flow to the most certain opportunities.

Let's review the market performance of QTPT and GEBT and find the most important investment logic. QTPT quickly rose after listing, reaching a peak of \$45, and we decisively sold at this key position, which was a completely correct decision. Why? Because QTPT's investors are mainly retail investors, and retail funds are extremely volatile. The high point after listing is often difficult to sustain. Once the market sentiment changes, the price will quickly fall back. Facts have proved that the strategy we have always adhered to, locking in the high premium profits of the primary market subscription, rather than falling into the risk game of the secondary market, is the most stable profit model.

In contrast, the trend of GEBT shows another phenomenon. Due to the larger proportion of institutional funds, it rose continuously for 7 days after listing before it began to adjust. This strong trend is due to the stability of institutional funds, but it does not affect our investment strategy. Whether it is QTPT dominated by retail investors or GEBT dominated by institutions, our real goal is only one, to subscribe in the primary market and obtain certain profits through the listing premium!

What is the core logic here? As long as we are in the primary market, our profits are risk-free, but once we enter the secondary market, risks are inevitable! Why?

Because the price of the secondary market is determined by many factors such as supply and demand, market sentiment, capital flow, technical aspects, etc. Even a powerful quantitative trading system like AlphaStream 5.0, with an accuracy rate of more than 90%, cannot achieve 100% accurate prediction. We cannot pin our wealth on uncertain market fluctuations, but must firmly grasp the opportunities in the primary market and go all out without hesitation in the face of certain profits.

This is the most important lesson we learned from QTPT and GEBT: the real winner is not to gamble on the rise and fall in the secondary market, but to decisively cash in profits at the best time after subscribing in the primary market!

Now, the subscription progress bar of MDHT has exceeded 3300%, and we are once again standing in front of a once-in-a-lifetime opportunity. This is an opportunity to win without gambling or guessing, as long as you participate. The market has given the clearest signal, the only question is, are you ready to act? Opportunities are only reserved for those who know how to make decisive decisions. Let us use the most resolute execution to lock in this round of the most stable and certain profit opportunities!

Dear friends, why is "Green Special Channel" called a win-win or even multi-win business model? It not only provides us investors with unparalleled advantages, but also brings an immeasurable improvement to the market value of MDHT. This is not just an investment strategy, but a financial innovation that completely changes the rules of the game!

Imagine that in a regular IEO online subscription, you are facing thousands of competitors, each competing for a limited share of tokens, and the probability of winning is infinitely diluted. The "Green Special Channel" directly opens up a shortcut for us, you don't need to compete with the market, don't need to worry about the subscription winning rate, and fully lock up to 15%-45% of the token share. This is not only an efficient asset allocation, but also the best return for smart investors.

So, how can we stay invincible in this competition? The answer is simple:

First, make full use of the power of funds, increase investment, and maximize your allocation ratio.

Second, actively apply to purchase the "Green Special Channel" to ensure that you grab the largest share in the early stage of MDHT.

Third, pay close attention to market dynamics, flexibly adjust strategies, and ensure that profits are locked in at the best time.

This is not just an investment strategy, it is a new way of capital operation, which brings the following three transformative values to MDHT:

1. Market value growth, driving up market prices

Through the "Green Special Channel", a part of the tokens have been locked in the hands of specific investors before listing, and the tradable shares in the market have been greatly reduced. However, demand continues to soar, and the reason behind the surge in progress bar data is the accelerated rise in listing prices. In other words, the value of the MDHT tokens in your hands is one step ahead of other investors in the market at the moment of listing!

2. Trigger a chain reaction and attract more investors to pour in

The market always tends to the most profitable place. When the subscription progress bar of MDHT breaks through 3000%, 4000% or even higher, market attention and FOMO sentiment will be completely ignited. Institutional investors and high-net-worth individuals will increase their buying power when they see prices continue to rise, forming a snowball effect of funds, and ultimately boosting MDHT into a super bull market track!

3. Optimize shareholder structure to ensure long-term growth

The case of QTPT tells us that markets dominated by retail investors tend to be volatile and susceptible to short-term speculative behavior. MDHT has attracted more powerful investors through the "Green Special Channel". The entry of institutional funds not only brings stability, but also enhances the market's long-term confidence in the project. This means that our investment will be more stable and avoid missing out on greater profit margins due to short-term market sentiment fluctuations.

This mechanism not only puts us ahead in the investment track, but also lays a solid foundation for the long-term growth of MDHT. When you hold the "Green Special Channel" security key, you are not only an investor, but also a promoter

of this market change. This is not just an opportunity, but a choice that determines your destiny.

Dear IAT family, victory belongs to those who act bravely! When we delve into the groundbreaking business model of "Green Special Channel", have you realized who is the biggest winner of this game?

First of all, there is no doubt that the issuer of the MDHT project is an important role in this victory. With this model, they not only greatly increased the market value of MDHT, but also gained high market recognition at the lowest cost. This model is far more efficient than traditional equity financing. After all, when the valuation is improved and then equity financing is carried out, the value can be maximized, this is the path that smart people will choose.

Secondly, the CRYPTIFII exchange center is also one of the winners. By introducing high-quality IEOs and innovatively launching the "Green Special Channel", they not only brought in a huge amount of trading traffic, but also stabilized the loyal user base and improved market competitiveness. The success of the exchange means that they will attract more high-quality projects

in the future, which will form a virtuous circle and consolidate their market position.

But who is the most crucial winner? It is us, every "Green Special Channel" member of the IAT community!

This privilege allows us to enter the core asset pool of MDHT in the most direct and efficient way, enjoy an ultra-high allocation ratio of 15%-45%, bypass market competition, and lock in certain profits. This not only makes our investment more stable, but also puts us on a high ground that ordinary investors can hardly reach.

All of this is the result of our joint efforts! We have proved with practical actions that the power of unity is far greater than fighting alone. It is precisely because of the active participation of all members of the IAT community that we were able to establish a strong capital pool, negotiate with the trading center, and finally win this precious opportunity.

Your trust and support are the key to our success today!

So, this is not just an investment, but a victory!

When you invest alone, you may be limited by the size of funds, market fluctuations and even luck but when you become a member of the "Green Special Channel", we are no longer scattered soldiers, but a united elite force, enjoying the overall advantages of the team and VIP-level market treatment.

In this world, there is nothing more important than "walking with the strong"! When ordinary investors are still struggling in the market, we have already stood firmly among the winners with this "pass". This is an opportunity that cannot be missed, an opportunity for you to enjoy victory in the most relaxed way!

Samuel will bring you a more in-depth analysis to explain in detail how to maximize the "Green Special Channel" privilege this afternoon. If you have any questions about the strategy, or want to know more details, please contact me immediately, don't hesitate!

Let's work together and strive for a brighter tomorrow every day! 🚀🔥

3:30 PM

Samuel Turner

Closing Commentary (α & β Strategy)

Good afternoon, community members!

I am Samuel Turner. In the past week, we have deeply analyzed the operation logic of Green Special Channel (GSC) and the huge difference between it and ordinary subscription. But the real question is: Do you really realize how to use GSC to maximize your profits?

Believe me, this is not just a chance to make money with zero risk, but a VIP pass to bypass market competition and reach the peak of wealth! Faced with such an opportunity, will you choose to stand by and watch, or take decisive action? Today, I will take you through WEALTH MATRIX again, deeply

understand the necessity of GSC, and reveal the ultimate profit strategy of MDHT IEO!

💡 Think about a question: Do you want to be a winner or a bystander?

Many friends have participated in the ordinary online subscription of MDHT, but I want to tell you that GSC is the fastest way for you to lock in MDHT shares in advance! This morning, the helmsman has clearly emphasized a simple but crucial fact, the opportunity is right in front of you, and your choice and positive action determine your future!

Ask yourself:

- ◆ In the face of a zero-risk, certain, high-return opportunity, do you have the courage and execution to go all in?**
- ◆ Are you tired of watching opportunities slip away from your fingertips, but you are helpless?**
- ◆ Are you tired of poverty and mediocrity, and eager to change the trajectory of your life?**

◆ Are you willing to plan your wealth freedom in advance and get rid of the limitations of traditional investment?

If your answer is "yes", then MDHT will be your most important decision at this moment! If you miss it, you may never find such a perfect opportunity again!

👉 What is the reality? The progress bar has soared to 3500%, and the advantages of GSC are beyond words. Investors with GSC will get up to 10 times the allocation share than ordinary subscription methods! This is your direct train to wealth freedom, and the only thing you have to do is to take action!

The opportunity is here, and there is only one question left: Do you dare to take action?

Guys, the signal given by the market couldn't be clearer, smart money is quietly withdrawing from the traditional market and turning to the more certain crypto market, and we are already on the right track!

This morning, helmsman deeply analyzed the risks faced by the magnificent seven of the US stock market, and the trend of the three major indexes has further verified this. Look at the daily candlestick chart of the Nasdaq. The longer it continues to trade sideways at a high level, the more unfavorable it is for bulls. Smart investors understand that it is only a matter of time before the index pulls back. If your funds are still stuck at the high level of the stock market, now is a great time to sell! It is always wiser to lock in profits before the market plummets than to passively stop losses in panic!

The flow of smart money has changed. In the current market environment where risks are accumulating and uncertainties are increasing, more and more funds are fleeing high-risk assets and turning to the crypto market with more certainty and stronger profit effects. For our friends in the IAT community, we have not only successfully avoided the risk of a stock market decline, but also preemptively laid out in the crypto market and gained rich returns!

-

- The early futures contract trading has enabled our funds to achieve amazing fission
- The current IEO market shows a profit effect that exceeds traditional investment
- The real smart money has already flocked to the zero-risk deterministic opportunity - MDHT IEO subscription and GSC green special channel!

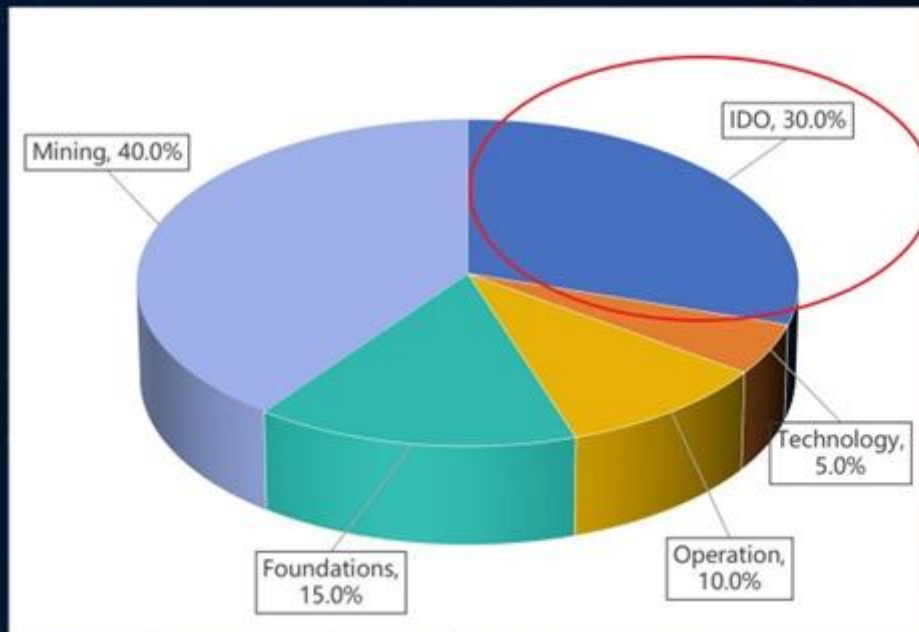

Stay away from high risks and seize the real wealth opportunities. The winners in the market are always those who dare to make wise choices. MDHT IEO is not only an opportunity, but also the most stable path for wealth growth in the current market. Do you want to continue to gamble in the turbulent market, or choose a certain track to achieve stable returns? The answer is very clear!

 Now is not the time to hesitate, but the time to act! 

This is the greatest respect we should have as investors, avoid market storms and invest funds in the real golden track! While the market has not fully awakened, seize this once-in-a-lifetime opportunity and welcome the next wave of wealth growth with us!   

5.2 Token distribution model

- Token name: MDHT
- Total supply: 1 billion tokens
- IDO: 30% (online subscription and allocation. Online subscription accounts for 20% and allocation accounts for 80%)
- Team: 5%
- Marketing: 10%
- Base: 15%
- Mining: 40%

Guys, I have to emphasize it again - the slicing distribution of MDHT gives us a unique opportunity! This is not just an ordinary IEO, but a real financial revolution, a capital frenzy that is about to detonate the market.

Subscribe		Allocation		
Upcoming		Offering		
Name	Start time	Closing time	Schedule	Action
 MDHT / USDT	02/17/2025 12:30:00 AM ET	02/26/2025 12:00:00 PM ET	<div style="width: 3822.18%;"><div style="width: 3822.18%;"></div></div> 3822.18 %	Subscribe

MDHT's IEO issuance share plus the institutional allocation has surpassed the sum of GEBT and QTPT, becoming the focus of the market. GEBT has attracted the attention of institutional capital, QTPT has become a star that retail investors have flocked to, and MDHT is the super main battlefield where all capital players are fighting together! It has a larger market capacity, stronger liquidity, and future growth space far exceeds any previous IEO project.

How to maximize your returns? Now, please think about a key question, how to maximize your allocation?

The market has given the clearest answer: if you only rely on ordinary online subscriptions, you will face a very low chance of winning.

Looking at the exponential growth of the subscription progress bar, it is telling you a reality: the final allocation ratio will be severely diluted. If you just subscribe normally, you may not even be able to guarantee a 2% winning rate. The Green Special Channel (GSC) is our trump card to break this limitation, allowing us to bypass the crowded subscription track and directly lock in up to 15%-45% of the allocation!

GSC - an absolute advantage that changes the rules of the game

- Ordinary subscription = extremely low winning rate, which may be less than 2%, long capital occupation time, and great uncertainty.
- GSC channel = 15%-45% locked shares, not affected by the subscription progress, directly obtain the maximum amount, and enjoy the market premium bonus.

Guys, this is no longer a question of "whether there is an opportunity", but whether you dare to seize this opportunity of certain profit! Here, we are not bystanders in the market, we want to be the masters of the market! That's why we have to invest all our efforts in GSC to ensure that we have the upper hand in this wealth storm! The opportunity is already in front of us, do you choose to

hesitate and wait and see, or take decisive action? 🔥 Act now, take your GSC allocation, and let MDHT become the booster of your wealth leap! 🚀

GSC not only allows you to get more MDHT tokens, but also directly rewrites the rules of the game! This is the core asset of our community and the biggest advantage between us and our market competitors. You can hesitate in your daily life, but at this critical moment, you can't and shouldn't be a step behind! This is not only an investment opportunity, but also a financial revolution. You have the opportunity to stand at the forefront of change and become a market winner, not a bystander in the market!

Looking back on your investment career, have you ever made a lot of money by acting decisively? Or have you ever missed the opportunity to change your financial situation because of indecision? GSC is your ticket to self-salvation, and a key step for you to cross classes and rewrite the trajectory of your future wealth!

But please note a core point: as investors in the primary market, what we really care about is not the total market value of MDHT, but the circulating market value!

This is crucial because those locked tokens have no impact on us. Our goal is to maximize the profit after the listing, rather than fantasizing about holding a token for a long time until it reaches an unattainable price. The profit of the primary market is the most certain and stable!

This is why MDHT is a zero-risk, sure-win opportunity for us! The logic is very simple: subscribe in the primary market, wait for online trading, sell to lock in profits and realize generous returns. This is similar to the "new listing" in the traditional stock market. Our goal is not to hold for a long time, but to accurately capture the price premium when the IEO is listed to ensure maximum capital efficiency!

As for the secondary market? That is the battlefield of AlphaStream 5.0! It can help you accurately capture market trends, optimize trading strategies, and bring you sustained profits in longer-term market fluctuations. But at this moment, our strategy is still to seize the opportunity in the primary market and lock in the maximum profit in the shortest time!

Guys, this is a battle for wealth that belongs to us! If you have subscribed to MDHT but have not purchased GSC yet, now is the time for you to take action!

Time will not wait for you, and opportunities will not always be in front of you. Seize this historic opportunity and let us win together in this investment feast! 🚀 🔥

This is not just an investment, it's a financial revolution! GSC is not only your privileged channel to enter MDHT IEO, but also a real opportunity to make a fortune. The market has already proved everything with data, how much can ordinary subscribed investors get in the end? 1%? 2%? Or even less. GSC directly gives you 15%-45% allocation, allowing you to get rid of market uncertainty and stand at the forefront of advantage.

You have to understand that this is not just about profits, but about the future financial landscape. Those who choose ordinary subscription to win the lottery can only get a tiny share in the fierce competition. Those who understand the market and decisively seize GSC have already locked in the initiative in the future. This is a change in market rules and a new pattern of the financial system. Are you willing to be a part of this change?

Now the question is, will you miss this golden opportunity like a bystander, or will you act decisively like a real winner? MDHT IEO is not an ordinary fundraising event, but a starship that is about to rush into the future. Now, the door of this spaceship has been opened to GSC holders, and do you have the courage to board it?

Guys, this is not just an IEO investment, this is our chance to witness history together and completely rewrite the investment landscape! ✨ GSC is your market disruptor, wealth transition channel, and overtaking secret!

🚀 MDHT subscription is about to enter the countdown, and time is running out! The progress bar has exceeded 3800%, and it is expected to break through 4000% before the subscription deadline. At that time, the allocation ratio of ordinary online subscriptions will be further diluted. If you want to grab a place in this epic feast, GSC is your only breakthrough point!

🎯 Opportunities only come to those who dare to act! Hesitate for a minute and you may miss an opportunity to change your life! Would you rather be a marginal player in the market and watch others return with a full load, or choose

**to control your own destiny and become a winner in this financial revolution?
The answer is clear, you need GSC!**

💡 How to lock your GSC allocation immediately?

✅ Step 1: Participate in the MDHT online subscription immediately to seize the advantage of being the first to enter!

✅ Step 2: After the subscription ends, contact the helmsman or assistant as soon as possible to apply for the GSC quota!

✅ Step 3: Complete the GSC allocation purchase, find customer service to confirm the lock, and ensure that you occupy a core position in this wealth storm!

🚩 The countdown has started! The subscription ends on February 26th, and we have entered the final 3 days of the sprint!

⚠️ GSC shares are limited, first come first served, if you miss it once, there will be no second time!

⌚ **The market will not wait, wealth belongs to those who are brave enough to take action! Guys, take action now, lock in your GSC shares, and start your own investment legend! 🔥 🔥 🔥**

AI 5.0
