**9:30 AM**

**Professor Theron Vale (Helmsman)**

## **Morning Review**

The screenshot shows a trading platform interface with a dark header and a white content area. The header has three tabs: 'Subscribe', 'Allocation', and 'History'. Below the header, there are four filter buttons: 'Upcoming', 'Offering' (highlighted in blue), 'Pending', and 'Winnings'. A table displays trading data with the following columns: Name, Start time, Closing time, Schedule, and Action. The table contains one row for 'MDHT / USDT' with a progress bar and a 'Subscribe' button.

Name	Start time	Closing time	Schedule	Action
 MDHT / USDT	02/17/2025 12:30:00 AM ET	02/26/2025 12:00:00 PM ET	 4503.49 %	<a href="#">Subscribe</a>

**Good morning, team!**

**I'm Theron Vale, your old friend. Time flies and in just blink of eye, our trading boot camp has been running for several months. From the public testing of AlphaStream 5.0 to the flawless conclusion of the Battle of King Profit Challenge, we've proven one thing. When you master the right strategies, the market becomes your personal ATM!**

**2025, the year of crypto, has officially begun. Bitcoin has just hit a historic high of \$110,000. Do you remember when we boldly bought BTC at \$60,000, waiting for it to break \$100,000? While many are still celebrating this achievement, the 450x surge in TRUMP token within two days has ignited the entire crypto market, officially kicking off the trillion-dollar ICO era.**

**GEBT, QTPT, and other high-quality IEO projects are delivering returns of 15x or more. In this market environment, even with a 20% allocation rate, the potential returns remain astonishing. Now, the final subscription progress for MDHT has locked in at 4503%, which means:**

- ✓ The opening price is already set to launch at a 45x premium, and profits are guaranteed!**
- ✓ The most important question is not whether you'll profit, but how much allocation you can secure!**

**This is your last chance, seize it!**

**Dear friends, we all know that market profits are endless but true certainty is rare. GSC holders are only allocated 15%-45%, but by participating in the Large Investor Allocation, the allocation jumps directly to 100%! This is a once-in-a-**

**lifetime chance to double your profits, a long-awaited surprise for early participants!**

**For those who missed out on GSC earlier, you cannot afford to miss this Large Investor Allocation! This is your last chance to correct that mistake and the only opportunity to secure MDHT at a 100% allocation rate. The opportunity is right in front of you. Will you take action or will you let it slip away again?**

**This is a game for the strong! Market does not sympathize with hesitation, only decisive investors stand on the winning side. This is not just another investment. It's a zero-risk, first-round market feast. Still skeptical? Still hesitating? The market won't wait for you, and if you miss this, you may never see such a high-certainty opportunity again.**

**If you have any doubts or difficulties, reach out to the team immediately. We're here to help you solve all the confusions. But remember, the market doesn't wait, time doesn't stop, and winners are always those who take that decisive step forward!**

**This time, make sure you're on the right side. 🚀 🔥**

**The market is in turmoil, and smart investors know that the real winners are those who stay in control during the storm.**

**A full-scale trade war is escalating, Wall Street panic is spreading.**

**The three major U.S. stock indices have pulled back significantly, filling the gap left since November 6. The stock market has erased all gains since Trump's election. The Bloomberg-tracked Magnificent Seven index has dropped nearly 17% from its peak in December, signaling a deep transformation in the market.**

**▼ Trump's tariff war is in full force, escalating global trade tensions!**

**Trump announced a 25% tariff on Canadian and Mexican goods, along with an additional 10% tariff on China exports to the U.S. In response, Canada retaliated with a 25% tariff on U.S. imports and is considering restricting electricity exports, while Mexico's president has vowed countermeasures.**

▼ The US dollar was sold off, and the investment logic of US stocks was completely overturned!

As global investors began to sell the US dollar, the US dollar index hit a three-month low. Wall Street traders have begun to question whether "buy on dips" has turned into "sell on rallies"?

▲ Trump scrambles to save the market, but can market confidence be restored?

According to U.S. Commerce Secretary Lutnick, the Trump administration may cut some tariffs on Canada and Mexico or offer concessions under the USMCA agreement. However, fears are growing that this wave of trade conflicts will plunge the U.S. economy into stagflation, a scenario of high inflation and low growth, draining market liquidity. Will the Federal Reserve be forced to resume rate hikes?

✦ Top Wall Street economists are issuing stark warnings: stagflation risk is approaching!

- **Mark Zandi, Chief Economist at Moody's: The tariff war will slow the economy and fuel inflation. The U.S. is at risk of entering stagflation. If this comes true, it will be the first stagflation crisis in the U.S. in 50 years.**
- **Atlanta Fed's GDPNow Model: Predicts a 2.8% contraction in Q1 GDP, marking the first economic decline since 2022.**
- **Robert Kiyosaki, author of Rich Dad Poor Dad: The market is on the brink of a major crash. Investors must prepare, safe-haven assets are key.**

**The rules of the game in market have changed, how should investors respond? This market correction is not a simple technical pullback. It marks a structural shift in U.S. equities. With high inflation, supply chain disruptions, and a potential Fed rate hike, the old investment playbook is obsolete.**

**✗ "Buying the dip" may no longer work, the new strategy is tactical retreat and waiting for the right re-entry point!**

- ✓ **Understand the market's broader trend, don't rush in blindly!**
- ✓ **Avoid high-risk assets, prioritize certainty and safe-haven plays!**

**✓ Follow capital flows, investors are already seeking new shelters for their wealth!**

**Friends, this is the reality of capital markets, the market doesn't move based on your expectations. Only by positioning yourself in the right cycle can you take control of wealth creation. This is not just another correction, it's a reset of the financial game itself.**

**In next few weeks, the trend of US stocks will determine everything!! Now is not the time to predict a bottom, it's time to ensure survival and prepare for the next great investment opportunity. Fasten your seatbelts as bigger waves are coming.**

**Today, the U.S. stock market is in turmoil, panic is spreading on Wall Street, and trade wars, inflation, and interest rate uncertainty are putting the stock market under tremendous pressure. In sharp contrast, the crypto market is experiencing unprecedented policy dividends and institutional capital frenzy.**

**Trump, the first U.S. president to fully embrace crypto, is fulfilling his campaign promises, turning the U.S. into the world's crypto capital! From this point, the signs are clear. Strategic crypto reserves, regulatory reforms, institutional capital inflows.....the crypto market is gradually becoming a safe haven for global capital.**

**◆ The first White House Crypto Summit is about to be held! This Friday, the White House will usher in the most important crypto conference in American history. This event will undoubtedly push the heat of the crypto market to a new peak. Industry giants who have confirmed their attendance include:**

- ✓ Coinbase CEO Brian Armstrong**
- ✓ Robinhood CEO Vlad Tenev**
- ✓ Kraken CEO Arjun Sethi**
- ✓ MicroStrategy founder Michael Saylor**
- ✓ Paradigm co-founder Matt Huang**
- ✓ Multicoin Capital managing partner Kyle Samani**
- ✓ Chainlink co-founder Sergey Nazarov**

**These names represent the top capital forces in crypto. What does their gathering mean? It means that policy adoption, regulatory clarity, and crypto market has officially entered the mainstream financial system!**

- ◆ **China is following closely, preparing for a national Bitcoin reserve strategy.**

**The Trump administration moved quickly, and China was not far behind. According to White House advisor David Bailey, China is quietly planning a national Bitcoin reserve and has already held closed-door meetings on implementation. Meanwhile, MicroCloud Hologram Inc. has reportedly acquired \$200 million in crypto investments!**

**Friends, we are witnessing an era where sovereign countries around the world are competing for crypto! This is no longer ordinary market speculation, but a capital game at the national strategic level. What does this mean? It means that crypto market is ushering in a super cycle! In 2025, it will be comparable to or even surpass the crypto boom of 2017!**

**2025, the year of crypto! You have two choices:**

- ✓ **1. Watch for Bitcoin's stabilization and buy-in opportunity**

Bitcoin has already surpassed its historical high of \$110,000, and this short-term correction presents a strategic window for positioning. Earlier, we precisely entered at \$60,000, held with conviction, and finally witnessed its historic break past \$100,000, a perfect execution. Now, the question is: How do we position ourselves this time? The answer remains clear, wait for the right moment and strike with precision!

📌 Once MDHT goes live for trading, our subscription funds will be fully unlocked, and the market is currently undergoing a short-term correction. Bitcoin is pulling back from its highs, technical indicators are resetting, and we don't need to rush in. Instead, we must patiently wait for the correction to complete, confirm a trend reversal, and execute another precise entry! With global capital inflows accelerating, the \$150,000 target for 2025 remains unchanged!

The screenshot shows the 'Allocation' tab for the MDHT / USDT offering. It includes a progress bar indicating 47.49% completion and a 'Subscribe' button. The table below details the offering schedule.

Name	Start time	Closing time	Schedule	Action
MDHT / USDT	02/27/2025 12:10:00 PM ET	03/15/2025 11:50:00 AM ET	47.49 %	Subscribe

## ✔ 2. Seize the zero-risk opportunity in high-quality IEOs: MDHT Large Investor Allocation

With a 45x profit margin already locked in, the real question is not “Should I participate?” but rather “How can I maximize my allocation?” For early GSC investors, participating in the Large Investor Allocation automatically upgrades them to a 100% allocation. If you haven’t participated yet, this is your last chance to make up for it.

**The true winners are those who take decisive action!**

**We are standing at the beginning of another golden decade in crypto, and today’s decisions will redefine the future wealth landscape. Will you hesitate again, or will you seize your once-in-a-lifetime opportunity?**

**Remember, the market won’t wait for you, and wealth won’t automatically land in your pocket just because you’re watching from the sidelines! The crypto wave of 2025 is already sweeping the globe. And you? Will you ride the tide or be drowned by it? 🚀 🔥**

**Dear friends, maybe you've stumbled in the market before. Maybe you've endured painful losses. Maybe you've watched golden opportunities slip through your fingers. But let me tell you. This is not the end, it's the trial that will lead you to victory!**

**Your ability to stand at the top depends on whether you have the courage to rise again! Think about our country, America!**

**This is a nation built on courage, challenge, and breakthroughs! If our ancestors had backed down in the face of adversity, would we have become the world's leading economy? If the U.S. military had hesitated at Normandy, would we have won World War II and rewritten history?**

**The market is no different, it's a battlefield! You can be afraid, you can hesitate but the market won't wait for you.**

- ◆ **In 2024, we decisively seized the AI stock boom and witnessed an insane rally!**
- ◆ **In 2025, the crypto market has arrived at its defining moment!**

**Will you hesitate this time? Will you still choose to stay on the sidelines again, watching others reap massive gains while your hands remain empty?**

**The market belongs to those who dare to bet, who persist, and who push forward through the storm! "The market does not reward those who stand by and watch. It belongs only to those who dare to place their bets and fight to the end!" from a timeless truth on Wall Street.**

**My friends, lift your head, stand tall! No matter what you've experienced, no matter how many times the market has knocked you down, today is your day to rise again and claim victory!**

**🚀 Grip your tokens tightly, bet boldly, and let the market witness your courage!**

**Wealth belongs only to warriors, and you are destined to be a winner! 🔥 🔥 🔥**

**AI 5.0**

**Eastern Time, March 06, 2025**

**3.30 PM**

**Samuel Turner**

**Closing Commentary ( $\alpha$  &  $\beta$  Strategy)**

**Good afternoon, community members!**

**I'm Samuel Turner, and the key question every investor cares about is: How can we stay ahead of market trends and seize truly strategic investment opportunities? The answer lies in one fundamental truth, capital flow reveals the market's real direction!**

**As the Helmsman said this morning, where capital flows, your focus should follow! Your account's profit and loss never lie, the only mistake is clinging to outdated thinking. True winners never stay fixated on past market logic, they keep their eyes locked on the trends of the future!**

**Look at the market right now, crypto is emerging as the global investment focal point, while the stock market's struggles are gradually coming to light! The logic behind this is simple: mainstream capital always follows the strongest market trend, and smart investors never go against the tide.**

**💰 Looking back at history, every great wave of wealth has been driven by major events that created market legends!**

- 2008 – After the financial crisis, the Federal Reserve's aggressive money printing fueled a super bull market in gold and U.S. stocks.**
- 2017 – The blockchain revolution ignited, and the ICO boom created a new wave of wealth.**
- 2020 – The Federal Reserve's unlimited liquidity injection led to an explosive rally in tech giants like Tesla, Apple, and Nvidia.**
- 2024 – The AI revolution began, with Nvidia leading the charge as big tech stocks doubled in profitability.**

🚀 And now, 2025 is setting the stage for a global crypto explosion! With Crypto President Trump returning, the crypto market is officially stepping onto the global capital stage. Every policy decision he makes is a key market indicator, shaping the next major financial wave. Capital is pouring into crypto at an unprecedented pace because this is the battleground where the next 100x and even 1,000x opportunities will emerge!

🔥 History never repeats itself exactly, but its patterns are strikingly similar! The power of trends can never be ignored! A close look at the Nasdaq's weekly candlestick chart reveals a clear picture, the 5MA has crossed below the 20MA, forming a classic bearish correction pattern. Meanwhile, the MACD has triggered a death cross, signaling that bearish momentum has yet to be fully exhausted. This isn't just a short-term fluctuation, the market is undergoing a structural adjustment!

📊 **The current market setup is eerily similar to the past, market cycles never lie!**

Looking at a broader timeframe, the Nasdaq retested the 250MA in March 2020, found support, and then launched into an epic bull run. The first major pullback of that rally occurred in March 2022, followed by a period of bottom consolidation, before a new surge began in March 2023.

💡 **Now, here we are in March 2025, history appears to be repeating itself!**

From a macro perspective, this Nasdaq correction may not find a true strategic buy point until it retests the weekly 250MA. Only after stabilizing around the 250MA can the market potentially trigger the next major rally!

📈 **In the stock market, real profits come from major trend waves and right now, the market is shifting after a prolonged consolidation at the top!**

Once a downtrend officially begins, every rebound becomes a sell-the-rally opportunity, not a chance to average in. Timing is everything. Once a trend is established, it's extremely difficult to reverse. The only way to capture the next big opportunity is to wait for the cycle to shift.

🚀 **Smart investors aren't distracted by short-term market fluctuations, they wait patiently for the true "golden pit" and strike at the perfect moment for a decisive victory! Are you ready? 🔥**

🔥 **Investing isn't about luck, it's about precisely targeting high-certainty opportunities! I've said this before: When the stock market feels risky, and I can't find a single stock worth a heavy bet, it means opportunities are uncertain. In that case, the best choice is to step aside!**

✦ **Trends determine everything!**

- **If the overall market is in a bullish trend, your margin for error is higher, even if you make one or two mistakes, you still have a chance to recover.**
- **But once the three major indices enter a bearish trend, the cost of trial and error skyrockets, and the probability of losses surges. In this scenario, stepping away from the market is the smartest move!**

**Of course, institutional capital operates differently from individual investors, their sheer size makes it impossible to exit positions as flexibly. Instead, they rely on hedging strategies, holding stocks while simultaneously shorting through options to mitigate downside risk.**

**🧩 In today's market, smart investors have already recognized the immense opportunity in crypto! But the real question is: How do you capture it with precision?**

**💡 The answer is simple, strategic vision!**

**The crypto market isn't a place where you can make big money by randomly buying anything. If you buy the wrong asset, you might end up with only modest gains or worse, miss the real breakout entirely! Timing remains critical in this market. Your goal isn't to blindly rush in but to precisely capture the trend and identify the highest-certainty opportunities, one decisive move that truly transforms your wealth trajectory!**

🔥 Bitcoin's next move, the market has already revealed the answer. But are you ready?

Right now, Bitcoin's weekly technical indicators clearly outline a market correction:

📉 **5MA has crossed below the 20MA, signaling that the short-term trend remains bearish.**

📉 **MACD has formed a death cross, indicating that the market still needs time to digest previous gains and repair technical conditions.**

📌 **From a trend perspective, a sustained rally in the short term is unlikely. The market is more likely to enter a consolidation phase. But does this mean there's no potential for a breakout? Absolutely not. The key lies in how the narrative unfolds!**

💡 **March 7, The White House Crypto Summit: The Real Market Catalyst!**

**U.S. Commerce Secretary Lutnick has already dropped a critical signal: Trump is set to officially announce the U.S. "National Strategic Crypto Reserve" at the summit!**

✅ **Primary reserve asset? Bitcoin!**

✅ **Reserve size? Far beyond market expectations!**

**Once the U.S. government officially designates Bitcoin as a strategic reserve asset, other nations will have no choice but to follow suit! This isn't just a sentiment booster, it has the potential to fundamentally reshape the asset allocation logic of the global financial system!**

**💰 In the short term, the market has already priced in this bullish catalyst, Bitcoin surging to \$95,000 or even higher is entirely possible! However, a full trend reversal leading to a sustained parabolic rally? That would be far more challenging. A more realistic scenario is this:**

**Bitcoin spikes on positive news, then enters a consolidation phase, using "time to exchange for space," building a stronger base, and gathering momentum for the next major surge!**

**🚀 When is Bitcoin's true breakout moment? 2025! A \$150,000 target is already market consensus, the only question is when to enter for the best risk-reward opportunity!**

**🚀 But the real wealth code isn't just Bitcoin, it's the next big wave in the crypto market: MDHT! This is the only true zero-risk primary market strategic investment opportunity available right now!**

**While Bitcoin consolidates, MDHT's listing and trading provide a chance to lock in substantial profits ahead of the next market wave!**

- ✔ **A minimum 45x return is already secured!**
- ✔ **MDHT's launch isn't just about realizing gains, it's a clear signal for the next explosive phase in the crypto market!**

**The first step in establishing the Crypto Capital is securing a national strategic reserve for cryptocurrencies. What comes next? A revival of the 2017 ICO boom! But this time, the 2025 IEO market will be more regulated, more mature, and backed by institutional capital. The trillion-dollar opportunity is right in front of us and those who seize it first will lead the next financial revolution!**

**✦ This crypto bull market is just beginning, the real question is, how much do you want to take from this massive wave? The final decision is always in your hands! 🚀 🔥**

 MDHT / USDT	02/27/2025 12:10:00 PM ET	03/15/2025 11:50:00 AM ET	<div style="width: 52.78%;"><div style="width: 52.78%;"></div></div> 52.78 %	<a href="#">Subscribe</a>		

🔥 **Guys, time waits for no one, opportunities disappear in an instant!**

**As of today, the Large Investor Allocation progress bar has surged to 51%! That means half the allocation is already taken, if you're still hesitating, it might be gone the next second! 🌟 100% allocation, no lottery, no guesswork. What you subscribe for is exactly what you get! This is the most fair, most certain, and truly zero-risk opportunity in the market. But the real question is, are you willing to seize it?**

**Look at the past, a \$90 million institutional allocation was snapped up in just 4hr. Why? Because big money always moves faster than retail investors! They know where the real opportunities are, and they don't wait until the crowd catches on before making their move!**

🚀 The Large Investor Allocation is now in its final sprint, less than 50% of the allocation remains, and once it's gone, it's gone for good! This isn't something you can sit and think about, it's a battleground where immediate action is required! If you're still on the sidelines, ask yourself: Do you want to wait until everyone else has made their fortune, only to regret not taking action sooner? Or will you act decisively now and claim your spot?

🚀 Stop hesitating, opportunities belong to those who take bold action! If you have any questions or concerns, reach out to us immediately. We're here to help you seize this game-changing opportunity! Time waits for no one. The market won't give you a second chance. Act, NOW! 🔥 🔥 🔥
