Professor Theron Vale (Helmsman)

Morning Review

Good morning, team!

I'm Theron Vale, your old friend. Have you ever wondered how people earn their first pot of gold? For most, it's not the result of overnight wealth but the product of slow accumulation, repeated challenges, and relentless effort especially for those relying on salaries and labor income. The path is tough.

But there are some people who, through opportunity, wisdom, and sometimes a single bold decision, quickly seize that pivotal turning point and earn their first pot of gold. It's not just wealth, it's a symbol of confidence and hope. Yet truly life-changing opportunities rarely fall into everyone's lap. Many people spend their whole lives waiting for that one moment, only to miss it due to hesitation and fear. But others, those with courage and belief seize it without looking back.

This is the golden rule in investing: opportunities aren't given, they're fought for! You've probably heard the term "ALL IN." It may sound like reckless gambling, but sometimes, only by going all in can you grab the chance that truly changes your life! The problem is most people don't lose because of bad luck, they lose because of limited thinking, unable to see the opportunities hidden just beneath the surface.

MDHT is exactly that kind of life-changing opportunity!

For ordinary investors like us, MDHT has given us the chance to make dreams come true! Maybe you've already made millions or even tens of millions from this wave. That may not yet make you a billionaire but it's enough to change your life forever! This is one of those rare moments life presents us with and we've chosen to seize it with both hands!

But remember, success isn't the end, it's the beginning of a new journey!

Getting rich from one opportunity is hard, but achieving long-term wealth freedom through continuous smart decisions is even harder! That's where AlphaStream 5.0 comes in. It will help us steadily expand our victories, accumulate profits, and move closer to the life we dream of! But as wealth grows,

so do challenges and temptations. We must learn to control our wealth but not let wealth control us!

Wealth itself is never the ultimate goal. It's simply a tool for greater freedom, more choices, and higher value. When you truly control wealth, you gain the power to shape your life. But that requires even greater wisdom and stronger discipline to ensure that we manage wealth, not become its prisoner!

Now's the time to act! The excess profits from MDHT's trading debut are right in front of us, and with compounding, this wealth will continue to generate more opportunities and greater success! But the most critical step to unlock this future is actively negotiating repayments!

Dear IAT family, now is the moment to show wisdom and action!

Actively negotiating repayments isn't just about maintaining personal credit, it's about laying a solid foundation for future growth! These profits are rewards for our efforts, and it's up to us to manage and distribute them wisely, so they continue to create new opportunities and bigger successes for us!

🚀 Don't hesitate, act now!

✅ Proactively negotiate repayments and keep your credit impeccable!

✅ Allocate profits wisely, get your funds flowing, and generate more returns!

✅ Pave the road for the future and make sure you're in the best position when the next big opportunity arrives!

Remember, credit is your key to bigger success! Protect it, and you'll stand strong at every pivotal moment, ready to seize greater opportunities. So start today, make success your new normal! 🚀 🔥

Wall Street has a classic saying: Money never sleeps! 💰 📊

If you've already repaid your loans and successfully withdrawn massive MDHT profits, then aside from enjoying life, it's time to think about how to make that capital work for you. The market waits for no one, and opportunity always belongs to those who take action!

Right now, Tesla and Bitcoin are two major opportunities to watch. Both are nearing the end of their corrections, and the window for a rebound has opened!

Tesla (TSLA): A golden buying opportunity!

✅ The stock price has pulled back nearly 50% from its highs, entering a prime medium-term buy zone.

- ✓ The \$210–\$220 range is an ideal entry point with strong support.
- ✓ Short-term target: \$330, likely to be tested next month before following the broader market's choppy adjustment.

📊 Daily candlestick charts show some downward pressure at the Bollinger Band mid-line, but the market is in recovery mode. Once the trend reverses, Tesla's bounce potential will yield huge returns!

When capital begins to take an asset seriously, it's no longer a speculative fringe bet, but it's becoming part of the mainstream future! Bitcoin is exactly at that inflection point right now. After a call between President Trump and President Putin, Russia agreed to an immediate ceasefire, even though a broader 30-day ceasefire deal wasn't reached. Market's risk-off sentiment quickly faded, sparking a huge wave of buying in Bitcoin and other risk assets!

At the same time, U.S. government's stance on Bitcoin is changing dramatically! Earlier in March, Trump signed an executive order recommending Bitcoin be included in the national strategic reserve! However, the White House will not directly purchase new coins, but will only convert Bitcoin assets confiscated by the federal government.

However what's truly shocking is how aggressively local governments are moving!

Right now, 24 states are discussing state Bitcoin reserve plans. Local governments are acting faster than the federal government, with North Carolina and Minnesota leading the charge!

💡 North Carolina's Bitcoin Reserve Bill (SB327)

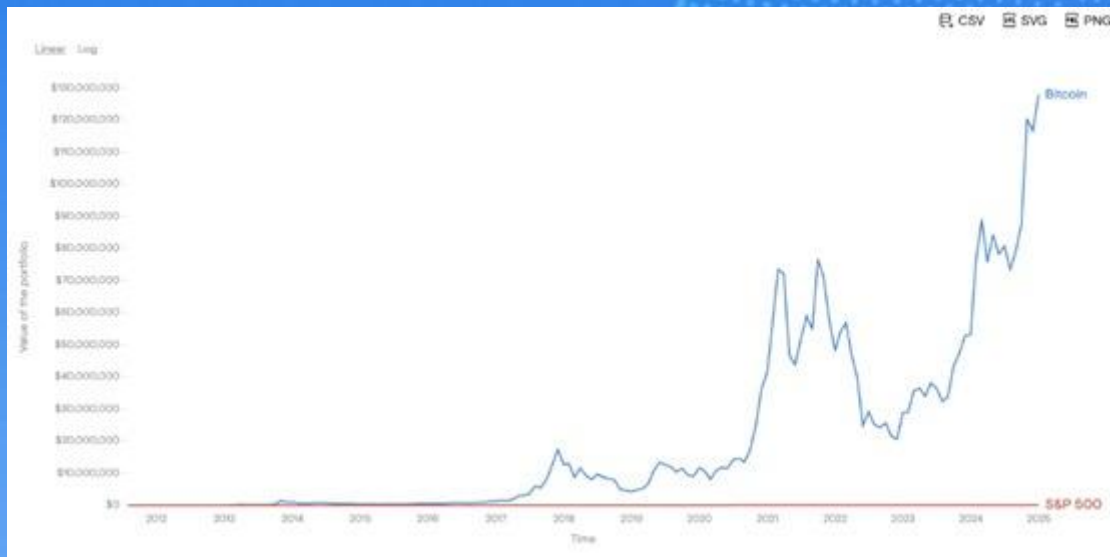

*** Allows the state to invest up to 10% of its reserve funds into Bitcoin each year!**

*** Strict rules: Bitcoin must be held in cold storage only, no custodians or market makers allowed!**

*** Only allowed to sell during "severe financial crises," forming a long-term value reserve!**

*** With \$9.5 billion in reserve funds, North Carolina could buy nearly \$1 billion in Bitcoin in one shot if this bill passes!**

According to Curvo data:

📊 From August 2011 to January 2025, Bitcoin's compound annual growth rate (CAGR) was an astounding 102.36%!

📊 In the same period, the S&P 500 had an annual growth rate of only 14.83%!

Bitcoin hasn't just outperformed every traditional asset, it's secured its place in the global financial system! Now, with state governments entering the market, Bitcoin's transformation from speculative asset to global value reserve is happening faster than anyone imagined!

Bitcoin (BTC): Next stop, \$91,000?

- ✔ **Holding steady around \$76,000, bullish momentum returning**
- ✔ **Daily candles sitting above the Bollinger Band mid-line with plenty of short-term energy**
- ✔ **This week, it could break into the \$91,000 range, the target is clear**
- ✔ **Long-term outlook: by the end of 2025, Bitcoin has a huge chance of hitting \$150,000!**

Of course, long-term crypto investing requires close monitoring of policy developments. But if you're looking for a more stable, consistent way to profit, AlphaStream 5.0's automated contract trading is undoubtedly the best option!

AlphaStream 5.0: The most reliable tool for steady profits!

- 🚀 **A truly stable, profitable quantitative trading system!**
- 📊 **It has repeatedly guided us to success, its strength is undeniable!**
- 📱 **Soon to be available on mobile and desktop, supporting fully automated trading with upgraded stability!**

Imagine your funds continuing to grow while you rest, travel, and enjoy life, truly making money that never sleeps! This is exactly the value that AlphaStream 5.0 brings to us!

The market won't wait, seize the opportunity and act now! Whether it's buying Tesla in batches, positioning for Bitcoin or using AlphaStream 5.0's automated trading, these are wealth-building opportunities you don't want to miss! 🚀 🔥

Friends, are you ready to take action in the face of this new, high-certainty opportunity? Market opportunities come and go in an instant, and right now, the most important first step is to actively negotiate repayment and unlock MDHT's substantial profits as soon as possible! Get your funds flowing again and keep your wealth growing!

Credibility is more valuable than any amount of wealth! Making timely repayments and fulfilling contracts is not just a legal obligation, it's your passport in the market. It represents your commitment to your partners, your responsibility to the IAT community, and your respect for the exchange. The

credibility you build today will directly determine whether you can access higher-quality market opportunities and greater investment returns in the future!

Do you remember when we stood at the threshold of the MDHT Large Investor Allocation? Many of you secured higher allocations, better investment terms, and broader opportunities because of your strong credibility. And today, the same principle applies as we enter the AlphaStream 5.0 era!

I know that many of you have already taken proactive steps to repay your loans. You're not just enjoying your success, you're also positioning yourself for the next major investment opportunity! You understand that unlocking MDHT profits quickly means being among the first to enter the market and seize the next big wealth explosion!

Meanwhile, others are actively securing funds to accelerate repayment, recognizing that hesitation could mean missing the next great opportunity! Don't wait until the market takes off to regret missing out!

✔ Take action now, negotiate your repayment and secure your financial position!

✔ Ensure liquidity, unlock your MDHT profits, and maximize your wealth!

✔ Strengthen your credibility to secure even better market opportunities and investment terms in the future!

💡 Remember, losing the market's trust means losing the gateway to wealth! The decisive actions you take today will determine the heights of your investments tomorrow!

Friends, the market is ready, are you? Take action now, let your wealth continue to grow, and prepare for an even more brilliant future! 🔥🚀

Samuel Turner

Closing Commentary (α & β Strategy)

Good afternoon, community members!

I'm Samuel Turner, and we are stepping into an unprecedented wealth storm, with our esteemed Helmsman steering this great ship! This morning, he unveiled a series of new investment opportunities, whether it's positioning in Tesla as it stabilizes at the bottom or buying Bitcoin on its pullback at \$76,000, all of these require sufficient capital support. Especially in the stock market, if your principal is small and you're not leveraging properly, your profit potential will be limited. That's why the most important task right now is to unlock MDHT's excess profits and prepare for the next battle. This isn't just about individual wealth growth, it's about how we seize the initiative in the upcoming market transformation.

At this moment, what is the most secure strategy? Actively engaging in structured repayment negotiations. This not only safeguards your personal credit record but also quickly frees up capital to prepare for upcoming investments. You must understand, market opportunities are fleeting. Hesitation and delay will only cause you to miss the next golden window. Right now, while premium IEO opportunities have yet to emerge, the market never stands still. Bitcoin's halving cycle is gaining momentum, and the trillion-dollar ICO boom of 2025's crypto bull run is already on the horizon. Bitcoin's scarcity and the full-scale revival of the ICO market are our guiding stars to the peak. This bull cycle isn't just about making money, it's about becoming a legend.

The battlefield we stand on is the crypto market, and our sharpest weapon is AlphaStream 5.0! This isn't just a trading system, it's a precision tool that cuts through market noise, keeping us ahead in the fiercest competition. But more importantly, it's not just a profit-generating tool; it's a crucial part of the Helmsman's ultimate vision, the future of the IAT Community Charity Fund. This isn't just an investment; it's a greater mission. We're not just here to achieve personal financial freedom, we're here to elevate the entire community to new heights, ensuring that more people benefit from the path we are pioneering. This isn't just a choice, it's a decision that will shape the future.

Look at MDHT's launch, this is the pinnacle of our collective wisdom and execution. This victory isn't just personal success; it's a monumental milestone for the IAT community. By seizing the right market opportunities with precision, we've generated astonishing returns in just a few months. This wasn't just a trade, it was a celebration of champions. And this is only the beginning! This phase of the Trading Mastery Bootcamp has spanned over four months, filled with countless challenges and breakthroughs. But it's precisely these challenges that have propelled us to new heights time and time again. Imagine our journey as an interstellar expedition, where every decision is critical. And what we've gained isn't just profit, it's a quantum leap in strategic vision.

Now that MDHT has launched, some of our members have already cashed in on their success. I see them enjoying a better life, luxury cars, beachfront villas, even private yachts. What were once distant dreams have now become reality. But this isn't just about material wealth, it's a complete shift in their mindset. Their smiles are more confident, their steps more assured, this is the posture of true winners! And none of this happened by chance. It wasn't luck, it wasn't waiting, it was sharp judgment, decisive action, and fearless execution that made it possible. Helmsman has always reminded us: True wealth isn't just the numbers in your bank account, it's how you use it to elevate your life and create a better future for your family.

Guys, we're not just making profits, we're witnessing an unprecedented wealth revolution. As we enjoy the fruits of our success, we must recognize a greater responsibility: expanding our impact, helping more people, and shaping a better world. This is exactly why the Helmsman is driving the IAT Community Charity Fund, it's not just a financial initiative, but a mission to create real change. Wealth accumulation isn't the finish line, it's just the beginning. The real goal is to transform it into something with greater social value. Now ask yourself: Do you want to stop at personal success, or do you want to be part of this historic movement? That's the real question you need to consider today.

Helmsman once said, "I will keep working until my body no longer allows me to." This isn't just a statement, it's an unshakable conviction. When you have the power to change the world, you don't stop. What we're doing today is not just for ourselves, it's for something far greater. With the resources we now hold, we have a duty to create more value. IAT Community Charity Fund is no longer just a vision, it's becoming a reality. And the success of AlphaStream 5.0 is the first step toward something even bigger. At this moment, are you ready to step into a grander future?

If you truly understand the significance of this revolution, then you know what matters most right now, taking immediate action! There's no time for hesitation, the market won't wait for you, opportunities won't wait for you, and wealth won't wait for you. Every decision you make today will determine your future success. Position yourself strategically, unlock your MDHT profits, plan your capital wisely, and prepare for the next wave of high-certainty market opportunities. This isn't just your personal victory, it's the crucial step for our entire community toward greatness.

Guys, we've already set foot on the path to financial freedom and historic transformation. The only thing you need to do now is stay in rhythm and keep moving forward with confidence. The opportunity is right in front of you, will you seize it, or let it slip through your fingers? Now is the time to act! Let's make history with our actions and write our own legendary story! 🔥🚀

it's time to face reality! To those who may be at risk of default, let me give you a serious reminder: Don't delay, don't gamble, taking proactive action is the best solution! We are navigating an unprecedented financial revolution, and any misstep could cost you the golden opportunities of the future. This isn't just about your personal financial situation, it's about your market position, your

investment credibility, and whether you can continue to stand at the top of this game.

If you, like me, went all-in on GSC and the large allocation, then right now, you're probably basking in the joy of massive profits. Let's be real, the biggest winners of this MDHT offering are those who fully committed to GSC and the large allocation. If you took decisive action back then, does your account balance excite you now? Are you finally experiencing the power of conviction and foresight? Look at those who hesitated in the market, too afraid to make a move, they can only watch as we celebrate victory, while they remain locked out of the wealth they could have had.

Now, let me tell you a fact that everyone must remember: The CRYPTIFII exchange will always side with the lenders. Why? Because they absolutely cannot afford the risk of widespread defaults! If they fail to enforce contract obligations and get sued by lenders, the potential compensation could be astronomical, not to mention the loss of industry trust, or even the complete collapse of the exchange itself. Simply put, contracts are the foundation of market stability, and lenders will always have the upper hand.

In the world of finance, there are no shortcuts to avoiding responsibility. If you default, you may go through the full cycle, collection notices, lawsuits, a plummeting credit rating, and even being blacklisted in the market. But that's not even the worst part! The biggest consequence? You could lose your VIP large investor status, meaning no more priority access to top-tier IEOs, no more exclusive behind-the-scenes deals. It's like being expelled from an elite investment club, cut off from high-level resources and insider information. Think about it, your market edge would be wiped out, while those who honor their contracts will continue securing massive profits from the next big opportunities.

So, what's my advice? Act fast and handle your repayment before the rush hits! Right now, C2C payment channels are under increasing pressure, and liquidity is tightening rapidly. Think of it like a Friday night traffic jam on the LA freeway—wait a minute too long, and you could find yourself stuck at an intersection with no way forward.

The smartest strategy? Get ahead of the crowd!

- ✓ Contact customer support early to schedule your repayment.
- ✓ Secure your funds and complete the process smoothly.

✓ **Unlock your profits and position yourself for the next, even bigger opportunity!**

Guys, the MDHT journey has begun, and we are making history! We haven't just exceeded expectations, we've written a brand-new chapter in the global investment market. And each of you is a part of this incredible achievement! Let's raise a toast to our victory and celebrate our vision and foresight! Yes, this journey hasn't been all smooth sailing. Some of us have faced market volatility, challenges, and even moments of doubt. But remember this: Real success isn't about avoiding the storm, it's about steering through it with confidence. It's our ability to face adversity head-on, to overcome obstacles together, that has made us stronger and more determined than ever!

At this moment, we are no longer just investors, we are the dominant forces of the financial market! Inspired by the Helmsman's vision, we are stepping onto an even bigger stage, ready to explore new galaxies of wealth. Are you ready to take on the next challenge? Are you ready to continue dominating this market? Let me tell you without a doubt, the best is yet to come! Let's keep pushing forward, accelerating through new wormholes, and charging toward an even brighter future! 🚀
