Professor Theron Vale (Helmsman)

Morning Review

Good morning, team!

I'm Theron Vale, your old friend. Just like that, the weekend is here again. This week, we've reaped extraordinary profits, have you already planned the perfect getaway for yourself and your family?

Looking back on these past four months of the trading boot camp, I couldn't be prouder of the dedication shown by every member of our family. From the initial planning to navigating the market's ups and downs, we gave it our all, no holding back and have finally achieved a resounding success! This isn't just about numbers growing, it's the ultimate proof of our unity and relentless effort.

Think about everything we've been through on this journey, the countless sleepless nights, the internal battles, and the constant market swings that tested our patience and decision-making. But it's precisely this hard work, persistence, and wisdom that have allowed us to stand out in a challenging market and create our own legacy of success!

The successful launch of MDHT is the best reward for our hard work! Now, as we look at the profits in our accounts, we have every reason to celebrate this well-earned victory! This isn't a stroke of luck, it's the result of our execution and determination. We stand at the peak of the market wave because we know how to navigate it, rather than being swallowed by it.

Now is the time to embrace this moment of triumph! Wealth is not the end goal, it's the tool that helps us achieve our dreams. We've earned our success through hard work, but we will never be slaves to money! It's time to reward yourself and your family, to celebrate these months of relentless effort, and to honor everything we've built together. Enjoy life, experience freedom, and make every ounce of effort even more worthwhile!

Friends, the market is always evolving, but our control over the future remains unwavering. Today's success is just the beginning, let's carry this victory forward and chase even greater goals! 🚀 🔥

Many have already completed their repayments, unlocked their MDHT surplus profits, and are now searching for the next high-confidence market opportunity. This is a moment worth celebrating, but also a critical turning point, the greater your financial flexibility, the stronger your position in the market!

Yesterday, I analyzed buying opportunities in Tesla and Bitcoin. In reality, there's no need to focus too much on the three major U.S. stock indices right now. The monthly downtrend is still in progress, but it won't decline indefinitely, it's more of a choppy descent, working to stabilize market sentiment and technical indicators. Based on the price action, we could see a minor rebound next month before the correction continues. This presents a golden window for spotting short-term opportunities!

Tesla (TSLA), after a more than 50% drop, has a high probability of rebounding early next month. This isn't just a technical rebound driven by oversold

conditions but also an inevitable trend of capital inflows. If you're looking for a high-probability short-term trade, Tesla is undoubtedly one of the top options to watch.

Bitcoin is the real game-changer! Currently, BTC is fluctuating between \$76,000 and \$91,000, making this a prime period for swing trading. If you can effectively execute a buy low, sell high strategy, your returns could far exceed expectations. However, the key to sustainable profitability isn't just about catching a few trades, it's about building a long-term, consistent profit model.

If you subscribe to AlphaStream 5.0 in the future and install it on your mobile or PC for automated contract trading, you'll truly have a highly efficient, stable, and highly predictable profit system. Market fluctuations will always exist, but if your trading strategy is disciplined and systematic, then wealth growth will no longer depend on emotions but on the precise execution of trading logic!

Therefore, the most important task right now is to actively complete your repayment and unlock your MDHT profits. This isn't just about short-term gains, it's about your market credibility and securing even better investment opportunities in the future. Credibility is one of the most valuable assets in the

capital markets, it determines your future leverage, investment limits, and access to key market resources.

Opportunities always favor those who take action! Take action now, ensure your financial flexibility, and position yourself to seize the next big market opportunity at any time! 🚀 🔥

The 2025 crypto market is facing an unprecedented historic opportunity with President Trump's return. As Bitcoin is upgraded to a global sovereign reserve asset, the shift in Bitcoin's supply and demand dynamics is triggering a new era of global wealth creation! In economics, supply and demand are the foundation of price fluctuations. Right now, the Bitcoin market is experiencing a highly unique and unprecedented supply-demand imbalance!

📊 Demand is surging: Institutional investors, governments, and retail investors are showing unprecedented interest, driving Bitcoin's global adoption at an exponential rate.

 **Supply is shrinking:** Due to Bitcoin's built-in mechanics, the circulating supply continues to decrease, while more investors choose to buy and hold rather than sell, further intensifying market scarcity.

When demand continues to rise while supply dwindles, the only possible outcome is a massive price surge! This isn't just an asset appreciation, it's a full-scale disruption of the traditional financial system. Bitcoin's future isn't just about wealth accumulation, it's a revolution of our time! We are standing at the threshold of a new financial era. Bitcoin is no longer just an investment tool, it's a gateway to the future of wealth. Its value extends beyond price appreciation; it represents a paradigm shift in the financial system, ushering in a decentralized, global, transparent, and truly free financial world!

As market awareness grows, a global consensus among Bitcoin holders is taking shape:

 **More and more investors are committed to accumulating BTC for the long term rather than short-term speculation!**

 **This "buy-and-hold" market behavior is reinforcing Bitcoin's scarcity effect, continuously driving up its market value!**

This trend is not just a market dynamic, it is the driving force behind Bitcoin's price surge! We are not just witnesses to history, we are the catalysts of this revolution!

This is not just a market storm, it is a true financial revolution! This is our era's calling, our shared opportunity! Looking back, every financial revolution has created a new generation of wealth builders from the rise of the stock market to the boom of the internet economy. And today, it is Bitcoin's turn to rewrite history!

Bitcoin's global adoption is only just beginning, and you are standing at the starting line of history! When we analyze the global user distribution chart, we don't just see how Bitcoin has risen from a niche asset over the past 15 years, we also gain a clear vision of its massive future growth potential. The red line tracks Bitcoin's historical trajectory, while the green line projects future user growth based on the principles of innovation adoption.

What's truly astonishing is that despite Bitcoin being one of the top 10 assets by market capitalization, only 0.35% of the global population actually holds Bitcoin! What does this number tell us? It reveals that Bitcoin is still in its early stages, with virtually unlimited growth potential ahead. Our generation is witnessing and actively participating in a historic financial revolution. This isn't just a shift in capital markets, it's a complete reshaping of the global wealth structure. The question is: when billions of people finally recognize Bitcoin's true value, will you be among the early winners, or will you passively accept the future that others have already defined?

Friends, this is our era of greatness, our chance to write history! This isn't just an investment opportunity, it's a responsibility that our time has entrusted to us!

Bitcoin is not just a vehicle for wealth growth, it offers us something unprecedented: the opportunity to actively shape the future!

This is exactly why the launch of the IAT Community Charity Fund is so crucial. It's not just the beginning of a new personal dream, it's a profound shift in our entire investment philosophy. The true value of wealth isn't just in accumulation, it's in its impact on the world and how resources are directed to where they're truly needed.

At the same time, we must recognize that our investment journey will not always be smooth. Every great opportunity comes with its own set of challenges. Liquidity management, contract fulfillment, market fluctuations, these are real obstacles. But it's precisely these challenges that shape the ultimate winners!

Smart investors always maintain control over their cash flow! Right now, we are in the midst of a Large Investor Qualification Defense Battle, ensuring that our capital remains flexible and strategically deployed. To achieve this, we've leveraged IAT community token staking and utilized the C2C lending service provided by the exchange. This is a strategic move, while it may create

short-term repayment pressure, in the long run, it secures greater financial leverage and control, giving us the upper hand in future market opportunities.

But remember, short-term pressure is temporary, and there are no shortcuts to success! We've already overcome tougher challenges, and this time will be no exception! Success always belongs to those who are disciplined and responsible. As borrowers, we have an obligation to fulfill our contracts on time. This isn't just about protecting our reputation, it directly impacts our future investment capabilities. Right now, the official customer service team has begun sending friendly reminders, and we must take these upcoming repayment deadlines seriously to avoid any impact on our credit rating or, worse, facing severe financial consequences.

-  **If your loan contract is nearing its due date, take action immediately!**
-  **Communicate with C2C merchants as soon as possible to ensure timely repayment and avoid default.**
-  **Your credit is the key to accessing bigger opportunities in the future, don't let short-term complacency jeopardize your long-term gains!**

✔ Losing your VIP investor status means missing out on premium IEO opportunities in the future, a loss we simply cannot afford!

💡 For those whose loans are not yet due, it's best to schedule repayment in advance! The number of people repaying their loans is rapidly increasing, and to avoid delays, I strongly recommend taking action early to ensure a smooth process. Act now, don't wait, taking initiative is the only way to secure your future!

When facing challenges, hesitation won't solve the problem, action is the best answer! We already have a clear strategy and a well-defined solution. Now, what matters most is everyone's active participation!

🗨️ Review today's recommendations, finalize your repayment plan, and communicate with customer support or C2C merchants to ensure everything is under your control! Friends, this time, you are on the right side! Let's face this challenge together and move toward an even more prosperous future! 🚀 🔥

Appreciate yourself for giving it your all, this is destined to be a fantastic weekend! Looking back on the week, we navigated market fluctuations, witnessed our own growth, and reaped the rewards we rightfully earned. Every decisive action and every firm execution has been the key to even greater success. At this moment, we have every reason to be proud!

Now, it's time to relax and fully enjoy this well-deserved weekend! Whether it's spending quality time with family or treating yourself to that long-awaited trip, make the most of it. This isn't just a reward for your hard work, it's also about recharging for the next big challenge ahead!

Friends, every step on the road to success is worth remembering, and every effort we give our all to is something to be grateful for! Wishing you all a fantastic weekend, enjoy life to the fullest, and we'll be back in action next week! 🚀 🔥

3:00 PM

Samuel Turner

Closing Commentary (α & β Strategy)

Good afternoon, community members!

This is Samuel Turner. This morning, Helmsman once again sparked our thinking. He spoke to us in the language we know best scarcity and offered deep insights into Bitcoin's core value in the future of the crypto market. Whether it's gradually positioning for Tesla's upcoming rebound or decisively buying Bitcoin below \$80,000, every strategic move demands that we mobilize our funds in advance and act with conviction.

And right now, the most critical step is unlocking our excess profits from MDHT.

Looking back on this nearly four-month journey of real-world training from the first public test of AlphaStream 5.0 to the "Battle of King" Profit Challenge, we

weren't just lucky; we were the ones who prepared early. While the rest of the market was still hesitating, we had already boarded the express train of the 2025 "Crypto Genesis Year." And MDHT's large investor allocation was our fast-track entry onto the path toward becoming millionaires.

Let's look at this from another angle:

Imagine you once took out a loan to buy a \$1 million property, and today its market value has soared to \$4 million. Now you want to sell and cash out, would you hesitate to pay off the remaining \$500,000 loan? Of course not! You'd be grateful, because that's the only way to regain full ownership and take complete control of your asset. Today, your MDHT tokens are just like that skyrocketed property, once you repay the loan, all the profits will be unlocked, and you'll be free to decide your next move in building even greater wealth.

I know some of you might be facing temporary challenges. But let me say this, this is not a reason to give up. It's the turning point where you break through your old self and truly level up. Don't let short-term inconvenience stand in the way of long-term financial freedom. Reach out to your assistant now, work out a clear repayment plan, you're doing it to pave the way for your own success.

Even more importantly, protect your credit. In this era, credit is your ultimate passport.

Once you default:

- **You won't just face late interest fees and additional penalties**
- **The trading center may temporarily freeze your account, and you could lose the VIP status and large investor privileges you worked so hard to earn**
- **In serious cases, it could damage your reputation across the entire financial system, cutting you off from access to high-quality investment opportunities**

Guys, missing out on an opportunity can be recovered but losing your credit? That could be game over. And let's not forget those who keep hesitating, watching their profits sit locked in their accounts, yet still refusing to take that one crucial step... Do you want to be a bystander or a decision-maker?

Let me tell you the truth: action is the only path to changing your destiny. So I encourage everyone, take the initiative right now:

- ✓ **Negotiate your repayment**

- ✓ **Unlock your profits**
- ✓ **Get ready for the next round of opportunities**
- ✓ **And don't forget, enjoy the good life you've earned!**

Thinking about buying that dream sports car? Taking your family on a spontaneous vacation? Stepping into the next level of investing? It all starts with one thing, whether you seize this moment. Don't let your success stay stuck on paper let it flow into your life and change your world. We're still on this journey, folks. The real voyage is just beginning. Grab this opportunity and unlock the stars and sea that belong to you.

Listen up, folks, every step we take right now isn't just about winning, it determines whether we rise to the true summit and become part of the core force behind the future IAT Community Charity Fund! Just like navigating through the stars, every precise adjustment matters. It ensures we stay on course and keep moving forward with purpose.

In the world of capital markets, we must never underestimate the power of dreams and ambition. It's that very force, under the guidance of our Helmsman,

that led us to create a historic achievement with MDHT. More importantly, this round of the “Trading Bootcamp” has given us practical experience we’ll carry for a lifetime. Tell me, folks, have you felt that electrifying rush?

But let me tell you one thing, this is far from the end! Our success in the AlphaStream 5.0 testing phase marked not only the most glorious victory for the IAT community, but also the realization of the Helmsman’s lifelong blueprint. It’s this very success that allowed AlphaStream 5.0 to fast-track its listing plan and reignited the Helmsman’s grand vision for the future.

Guys, our dreams in life are like a staircase, every step we climb is a firm commitment to the future. So tell me, are you ready to rise with us and charge toward the very top?

Wealth isn’t just about numbers, it’s about a change in lifestyle! A lot of people are still busy calculating their profits, but haven’t truly started enjoying the new life that wealth can bring. Guys, go talk to those friends who’ve already bought their dream cars, upgraded their homes, or made their dreams come true. Listen to what they’re really feeling. You’ll realize that crunching numbers and actually experiencing wealth are two completely different things!

Let me share a bit of my personal journey. When I had just \$5 million in my account, my mindset was completely focused on hustle and accumulation. I didn't even realize how to enjoy the fruits of my hard work. But when my α & β system helped me earn the kind of wealth in the crypto market that most people only dream about, I finally understood one thing, wealth isn't just about numbers. It's about the freedom to make choices in life.

It wasn't until I started buying the "rewards" I once thought were out of reach that I realized, the world can look completely different:

- ✓ No more drinking the same coffee every day, driving the same car, living the same routine life
- ✓ No more penny-pinching when spending, but truly enjoying a lifestyle that feels like mine
- ✓ No longer just making money, but using wealth as a tool to create happiness

In that moment, I finally understood what the Helmsman meant, true wealth isn't just about asset growth. It's about whether you can live freely within that wealth and experience limitless possibilities. When you no longer worry about money, when you no longer hesitate to give your child the best education, when you no

longer stress over providing a better life for your family, that's when you truly grasp the meaning behind the Helmsman's ultimate vision.

When many investors first enter the market, they dream of becoming the next Jesse Livermore. But once your asset base grows large enough, you'll realize the true goal is to become Warren Buffett. It's not just about accumulating wealth, it's about the evolution of mindset and vision. Looking back at the past few months, we've created countless miracles. But let me tell you this, everything we've achieved can be replicated. The profits you're seeing today may be just a drop in the bucket compared to what your portfolio could look like in the years to come!

✦ Remember, opportunities always belong to those who stay focused and seize every advantage.

✦ When you spot a great investment opportunity, never let it slip away, commit to it and follow through with conviction.

✦ There are no permanent winners in the market, but those who take swift action will always have the edge over those who hesitate.

Every step you take now is paving the way for even greater success! Today's triumph is only the beginning chapter of your journey to building true wealth. Are you ready to embrace an even bigger victory?

🔥 Take action, take control of your future!

A large, faded version of the IAT logo and the text 'AI 5.0' are centered in the background of the slide. The logo is a light blue 'X' shape, and the text 'AI 5.0' is in a large, bold, light blue font.
